Getting a Content Link Error Notification

**Content Link Error**
This setting alerts you when a student clicks a link to unpublished content, content with permission errors or a broken link.

**Head to “Account”**
on the global navigation menu and click on “Notifications”.

**You’ll see a chart.**
Scroll down to the end to “Alerts”.

**Select the check mark icon**
next to “Content Link Error” to notified immediately when students are unable to access content due to invalid or broken permission states.
